The Project

The goal of this project is to investigate further the different layers of learning coding and how they can create impact on women learners and contribute to building a larger set of competences, not limited to coding as a technical skill but including the so called soft skills.

How can women start learning?

By leaving their comfort zone, being aware of the learning zone, getting rid of their fears, getting self-esteem, transforming the PANIC zone into the MAGIC zone.

<http://www.youtube.com/watch?v=f6uOABIKJeg>

We have also define the word "coding" other possible jargon encountered to make sure everyone is on the same page, using the same vocabulary and concepts. We have deepened into the challenges, difficulties but also opportunities in teaching coding to women at a beginner level.

But what exactly is coding?

By 'Coding' we mean what makes it possible for us to create computer software, apps and websites. Your browser, your OS, the apps on your phone, Facebook, and this website – they're all made with code.

How to start coding? [VIDEO](#)

Marina, our coordinator is developing the topic in our Second Meeting at GoDigit, at Nottingham, the UK.

Natasha, our kind host invited guests for introducing us in the local environment of coding. Katharine, from Code Club presented Code Club World-all over Europe, Raspberry Pi & Teaching computer programmes to children (Futerlearn) XBOX, PS4, smart phones – enclosed in case - Coding skills-Astro P1-Pio.
